We Refuse! ¡No Pasaran! Shut Down Trump's Inauguration!

Roll with us to Say "NO" to the Racism, Misogyny, Islamophobia, Union busting and Anti LGBTQ and Anti Immigrant bigotry! On January 20th, hundreds of thousands of people will be storming the streets across the US against Trump's accelerated assault on migrants, LGBTQ people, women, unions, people of color, and the entire working class.

Now more than ever, we need massive resistance and unity in the streets to shut down Trump's agenda of racism, sexism, migrant-bashing, cutbacks and war. With capitalism in decline, this agenda can be a recipe for fascism. While both the Democrats and the Republicans are telling us now to accept the results of the election and look to "work with" President Trump, we completely refuse to accept this racist billionaire as the leader of this country.

Trump has no solutions for the real issues faced by billions of workers across the world. Capitalism, imperialism and the racist cops occupying our communities are the real problem. We, the millions of people ready to take direct action against the attacks of a Trump administration, are the solution. Only mass action can push back this racist, sexist agenda. We are entering a new era of historic resistance, led by the struggles of Black Lives Matter and the water protectors at Standing Rock. We stand ready to put our bodies in front of deportation busses, bulldozers, tanks and other war machines. The working class and oppressed must join together in this historic moment with the full understanding that real power is in the streets, not in the White House and not the Pentagon.

On Friday, January 20th, we will make sure our collective voice is heard throughout the halls of power and across the world. Join us! J20resist.org is a resource to assist this historic moment.
